PEDIATRIC NEUROLOGY
Subject Index Volume 19

Abscesses, epidural and pericranial, complicating frontal sinusitis as occult life-threatening events in comatose child, 385
Adrenoleukodystrophy, childhood, and transient visual symptoms, 62
Agenesis, cerebellar, MRI findings, 139
Aicardi-Goutiéres syndrome, and brainstem lesion, 145
Alice-in-Wonderland syndrome, and cerebral perfusion, 105
Anhidrosis, and hereditary insensitivity to pain, 227
Antiepileptic drugs
  And evaluation of bone mineral density, 129
  And serum lipids and lipoproteins, 364
Arthritis, juvenile rheumatoid, and cerebral vasculitis, 69
Aspergillosis, invasive, and myelopathy, 135
Axonal and congenital hypomyelinating neuropathy, associated with lissencephaly, 313
Axonal injury, diffuse, without direct head trauma and with delayed onset of coma, 382

Behavior and cognition after temporal lobectomy, and intractable epilepsy, 189
Bone mineral density, evaluation in children receiving antiepileptic drugs, 129
Book Reviews
  Frontiers in Cerebrovascular Disease Mechanisms, Diagnosis, and Treatment: James T. Robertson and Thaddeus S. Nowak, Jr./Editors, 155
  Measurement of Pain in Infants and Children: G. Allen Finley and Patrick J. McGrath/Editors, 155
Brain lesions
  In utero, and SIDS, 23
  Neuroradiologic findings related to exanthema subitum, 343
Brainstem auditory-evoked potential evaluation in meningitis, 109
Brainstem lesion in Aicardi-Goutiéres syndrome, 145
Brain tumors
  Comparative value of thallium and glucose SPECT imaging, 351
  Neuroimaging correlated with outcome, 259

Cardiac surgery, with choreoathetosis, hypothermia, and extracorporeal circulation, 113
Cavum septi pellucidi, does selection bias determine prevalence?, 195
Cerebellar atrophy, and alternating hemiplegia, 65
Cerebral complications of nonaccidental head injury, 119
Cerebral palsy, and epilepsy, 31
Cerebral perfusion in children with Alice-in-Wonderland syndrome, 105
Choreoathetosis after cardiac surgery with hypothermia and extracorporeal circulation, 113
Circulation, extracorporeal, hypothermia and choreoathetosis after cardiac surgery, 113
Clonazepam, as treatment for exaggerated startle responses for drop episodes in Coffin-Lowry syndrome, 148
Coffin-Lowry syndrome, drop episodes and exaggerated startle responses treated with clonazepam, 148
Cognition and behavior after temporal lobectomy, and intractable epilepsy, 189
Coma
  And epidural and pericranial abscesses complicating frontal sinusitis, 385
  Delayed onset, and diffuse axonal injury, 382
Convulsions, febrile, and epilepsy, and use of protein spectroscopy, 93
Corticospinal system, fast, and motor performances, conduction proceeds skill, 217
Cysts, intracranial arachnoid, 100

DNA T8993C mutation, mitochondrial, phenotypic variability, 283
Drop episodes in Coffin-Lowry syndrome, exaggerated startle responses treated with clonazepam, 148
Duchenne-Becker muscular dystrophy, and electroretinogram, 400

Electromyographic study of benign paroxysmal torticollis, 296
Electroretinogram in Duchenne-Becker muscular dystrophy, 400
Encephalopathy
  Acute necrotizing, and gray matter heterotopia, in trichothiodystrophy, 392
  Complicating Henoch-Schönlein purpura, reversible MRI changes, 74
  Herpes, early diagnosis using fluid-attenuated inversion recovery pulse sequence, 58
  Infantile epileptic (Otahara syndrome) and migrational disorder, 50
Enzyme deficiencies, and multiple sulfatase deficiency, 372
Epilepsy
  And cerebral palsy, 31
  Infant-onset focal, MRI lesions masked by brain development, 377
  Intractable, cognition and behavior after temporal lobectomy, 189
  Localization-related, without underlying disorders, 26
  Partial, evaluation by peri-ictal SPECT, 15
  Surgical treatment, 179
Exanthema subitum, neuroradiologic findings of brain lesions related to, 343

Fluid-attenuated inversion recovery pulse sequence used for early diagnosis of herpes encephalopathy, 58
Fractures, bone, and valproate therapy, 143

Guillain-Barré syndrome, immunoadsorption therapy, 55

Head injury, nonaccidental, and cerebral complications, 119
Hematoma, spontaneous spinal epidural, 302
Hemimegalencephaly in neonates, similar brain SPECT findings in subclinical and clinical seizures, 132
Hemiplegia, alternating, with cerebellar atrophy, 65
Hemispherectomy fMRI evaluation, regionalized sensorimotor plasticity after, 337
Henoch-Schönlein purpura complicated by encephalopathy, reversible MRI changes, 74
Hepatomegaly, dexamethasone-induced, 388
Heterotopia, gray matter, and acute necrotizing encephalopathy in trichothiodystrophy, 392

Hypomyelinating neuropathy, congenital, and axonal neuropathy, associated with lissencephaly, 313
Hypothermia and extracorporeal circulation, and choreoathetosis after cardiac surgery, 113
Hypoxia, neonatal, effect on medulla-spinal cord descending neurons, 204

Immunoadsorption therapy in Guillain-Barré syndrome, 55
Immunoglobulin, intravenous, successful use in Landau-Kleffner syndrome, 399
Infantile spasms (see West syndrome)
Insensitivity to pain, hereditary, and anhidrosis, 227

Klinefelter syndrome, and seizures, 275
Krabbe disease, and MRI nerve root enhancement, 151

Lamotrigine childhood overdose, 239
Landau-Kleffner syndrome, and successful use of intravenous immunoglobulin, 399
Leber's hereditary optic neuropathy (NDI/3460) with visual recovery, 308
Leukomalacia, periventricular
  In brains, and vascular endothelial growth factor, 45
  With West syndrome, 358
Lipoproteins and serum lipids in patients treated with antiepileptic drugs, 364
Lissencephaly associated with congenital hypomyelinating and axonal neuropathy, 313
Lobectomy, temporal, cognition and behavior after, and intractable epilepsy, 189

Medulla-spinal cord descending neurons, and effect of neonatal hypoxia, 204
Meningitis, and brainstem auditory-evoked potential evaluation, 109
Methylphenidate as probable cause of neuroleptic malignant syndrome, 299
Methylprednisolone treatment for transverse myelopathy, 279
Migrational disorder, and infantile epileptic encephalopathy (Ohtahara syndrome), 50
Mitochondrial DNA T8993C mutation, phenotypic variability, 283
Motor and fast corticospinal system performance, conduction proceeds skill, 217
Motor organization following early middle cerebral artery stroke, a PET study, 294
MRI
  Findings in cerebellar agenesis, 139
  Lesions masked by brain development, a case of infant-onset focal epilepsy, 377
  Morphometric study of West syndrome with periventricular leukomalacia, 358
  Nerve root enhancement in Krabbe disease, 151
  Reversible changes, and encephalopathy complicating Henoch-Schönlein purpura, 74
Myasthenia gravis, respiratory failure, and negative pressure support, 225
Mycoplasma pneumoniae, and abducens nerve palsy, 323
Myelin formation, alterations in fetal brains of twins, 287
Myelopathy
  Resulting from invasive aspergillosis, 135
  Transverse, rapid recovery with methylprednisolone treatment, 279

Nemaline myopathy, and respiratory failure, 156
Nerve palsy, abducens, in *Mycoplasma pneumoniae* infection, 323
Nerve root enhancement, MRI, in Krabbe disease, 151
Neurofibromatosis 1, and seizures, 347
Neuroleptic malignant syndrome and methylphenidate, 299
Neuronal ceroid-lipofuscinosis, late infantile, photoparoxysmal response, 395
Neuroradiologic findings of brain lesions related to exanthema subitum, 343
Nonaccidental head injury, cerebral complications, 119

Ohtahara syndrome and migrational disorders, 50
Optic neuropathy, childhood Leber's hereditary (NDI/3460) with visual recovery, 308

Pain, hereditary insensitivity to, and anhidrosis, 227
Paroxysmal torticollis, benign, electromyographic study, 236
Pediatric neurology practice plans, diagnostic problems, 272
PET study, following early middle cerebral artery stroke, 294
Pharyngeal dysfunction, congenital isolated, recovery and early management, 222
Phenotypic variability with a mitochondrial DNA T8993C mutation, 283
Photoparoxysmal response in late infantile neuronal ceroid lipofuscinosis, 395
Pseudotumor cerebri as presenting symptom of acute sinusitis, 153

Respiratory failure
  In myasthenia gravis and negative pressure support, 225
  In nemaline myopathy, 156

Seizures
  Electrically confirmed, and possible placental association, 37
  In Klinefelter syndrome, 275
  In neurofibromatosis 1, 347
Selection bias, determines prevalence of cavum septum pellucidi, 195
Sensorimotor plasticity, regionalized, after hemispherectomy, fMRI evaluation, 337
Sensory motor neuropathy, autosomal-recessive, 234
Serum lipids and lipoproteins in patients treated with antiepileptic drugs, 364
SIDS, and in utero brain lesions, 23
Sinusitis
  Frontal, epidural and pericranial abscesses complicating, 385
  Pseudotumor cerebri as presenting symptom, 153
Sjögren-Larsson syndrome, postmortem brain abnormalities, 399
Spasms, infantile (also see West syndrome)
  A proposal for staged evaluation, 368
  Neuroradiologic aspects, 211
  With periventricular leukomalacia, a morphometric MRI study, 358
SPECT
  Brain, similar findings in subclinical and clinical seizures in neonates with hemimegalencephaly, 132
  Peri-ictal, utility in evaluation of partial epilepsy, 15
  Thallium and glucose imaging, comparative value in brain tumors, 351
Spectroscopy, proton, use in epilepsy and febrile convulsions, 93

Spina bifida, epidemiology, 199
Startle responses, exaggerated, treated with clonazepam, in Coffin-Lowry syndrome, 148
Stroke, early middle cerebral artery, motor organization following, 294
Sulfatase deficiency, multiple, pathologic findings reflect pattern of enzyme deficiencies, 372
Survival estimates of severely disabled children, 243

Tail, human, 230
Temporal lobectomy, cognition and behavior after, and intractable epilepsy, 189
Topiramate efficacy in infancy, 320
Torticollis, benign paroxysmal, electromyographic study, 236
Trichothiodystrophy, gray matter heterotopia and acute necrotizing encephalopathy in, 392
Tumors, brain
  Comparative value of thallium and glucose SPECT imaging, 351
  Neuroimaging correlated with outcome, 259

Ultrasound, correlation with postmortem neuropathologic studies, 263

Vagal nerve stimulation, intermittent left, adverse events, 42
Valproate therapy, predisposition to bone fracture?, 143
Vascular endothelial growth factor in brains with periventricular leukomalacia, 45
Vasculitis
  Central nervous system, complicating pediatric Wegener's granulomatosis, 317
  Cerebral, and juvenile rheumatoid arthritis, 69
Visual symptoms, transient, as initial manifestation of childhood adrenoleukodystrophy, 62

Wegener's granulomatosis complicated by central nervous system vasculitis, 317
West syndrome
  A proposal for a staged evaluation, 368
  Neuroradiologic aspects, 211
  With periventricular leukomalacia, a morphometric MRI study, 358
